INSET TOUCHDOWN ZONE LIGHT

COMPLIANCES

ICAO: Annex 14 - Volume I Fig. A2-5

FAA: L-850B AC150/5345-46

IEC: TS 61827

NATO: STANAG 3316

CAA: CAP 168

IAAE: TP312

APPLICATIONS

Touchdown zone for ICAO CAT I, II and III, FAA and military runways

BENEFITS

- 1500 hours lamp rated life at full intensity, but over 3000 hours in field operating conditions
- Significant energy saving
- Designed and manufactured with simplicity and easy to maintain
- No use of sealant to fix the prism in the dome thanks to customized gaskets, making their replacement quick and easy
- No optical adjustment after lamp or prism replacement
- Valve for watertightness test after overhaul
- Dome temperature less than 160°C at 6.6A

PERFORMANCES

- 6.35 mm protrusion strongly reduces vibrations to aircrafts and to light itself, increasing its lifetime
- Dome smooth outer profile makes the light less sensitive to snowplough blades
- Unidirectional, 8" dia.
- Drop-forged dome and cast aluminium lower cover make the fitting sturdy, but lightweight too for ease handling in the field
- Light output practically not affected by heavy rainfall thanks to the shallow channel in front of the prism window
- O-Ring placed outside the dome to avoid dirt deposits between light and base
- Protection degree: IP67
- Temperature range: -55°C to +55°C

INSTALLATION

- Suitable for 8" dia. bases
- Adaptor ring for installation on 12" bases
- Specific tools available for easy and precise installation
